Sayed Farid

has successfully completed the online Specialization

Data Pipeline Engineering & Analytics

Congratulations on completing the Data Pipeline Engineering & Analytics Specialization! You now possess a comprehensive skill set that bridges data engineering and advanced analytics. This certificate validates your job readiness as a data professional capable of building end-to-end analytics solutions. Throughout this program, you engaged with hands-on projects and real-world scenarios, mastering: automated ETL pipeline development using Apache Airflow and streaming technologies; SQL optimization and dimensional modeling for enterprise data warehouses; advanced data transformation techniques with Python and pandas; user behavior analytics including segmentation, retention optimization, and funnel analysis; and interactive dashboard creation for data-driven decision making.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
